MONROE POLICE DEPARTMENT
THEFT REPORT

The “Theft Report” form is intended for citizens to file an official police report by completing the attached form for returning to MPD by email or printing a copy to return by standard mail.

Please note that certain criteria must be met in order to file this form:

1) The theft of property must have occurred within the jurisdiction of the Monroe Police Department in Monroe, Louisiana.
2) The person completing the form must be the owner of the stolen property.
3) No suspects are known, or to be sought after, at time of this report, nor does any potential evidence exist to establish future identification of any suspects.
4) The total collective amount of property stolen is less than $500.^{00}. The number of items is limited to ten items at this time.

Information Needed For Report

Most fields are self-explanatory and can be type or written in. Any dates entered should use the “mm/dd/yyyy” style, and include the four-digit year.

It is very important to use the 911-compliant address of the incident occurring at a specific location, and if at a business, to include that name in the appropriate field.

Victim information is required to enter information into the MPD records database.

Please use your first name as it appears on your birth certificate; any nicknames or aliases can be entered as such in the appropriate field.

Phone numbers should include the area code.

Specifying the dates and time of the incident create a time span in which MPD can query similar incidents of a related nature. Most incidents will have the date and time (“from”) to specify when the property was last observed intact, and a second date and time (“to”) to indicate the discovery of the theft.

Listing the items stolen should include the quantity of each item taken, a good description of the item, and the individual value of that item. The form will automatically calculate the quantity and per-item value, and display the running total at the bottom of the form.

Descriptions of items should include any serial numbers, make or model information, color, sizes, or other characteristics.

Provide a general statement of how the property was stolen, such as a bicycle being left in the yard and later discovered missing. This narrative will be included in the report verbatim.
